- SQL
- Microsoft SQL Server
- Microsoft Office
- Adobe Photoshop
- Adobe Illustrator
- Adaptability
- Communication
- Problem Solving
- Willingness to Learn

Detail oriented and driven full-stack web developer and software engineer with a passion for both logic and creativity. In the three years since entering my current position, I have been made team lead for two application teams and been praised for attention to detail and quick turn around time by clients and coworkers.

Professional Experience

Software Development Associate
Cognizant Technology Solutions | January 2023 - Present

- Hired by Cognizant after contracting with them for a year and a half and earning team employee of the month in December 2022.
- Led several application support teams for .NET based web applications through client assignment to a multinational insurance company.
- Represented my application support teams in discussions with Cognizant and client senior leadership.
- Spearheaded dynamic project teams comprised of myself and offshore team members, and ensured quick analysis and response times for 60+ tickets a month.
- Managed implementation of several major projects, impacting policies totaling over a million dollars in premium.
- Coordinated with cross-functional teams to identify process gaps and develop automated solutions, resulting in a smoother process and on average a decrease of five tickets a week.

Software Development Associate
Revature LLC | March 2021 - January 2023

- Studied front end, back end, and database programming, focusing on .NET web based applications, with company provided trainer. Selected to lead both small and large teams during training projects. Assigned to Cognizant team once training was completed.
- Analyzed existing application code and developed SQL queries and scripts to automate processes for client facing applications.
- Led a team of myself and two offshore employees as we addressed production issues and implemented enhancements for an application with 200+ users.
- Received praise for my reliably quick turnaround and quality of work directly from clients to my manager.

Web Development Intern
Visual App | August 2019 - January 2020

- Worked independently to update existing HTML, CSS, and PHP code according to client specifications.
- Created graphic and text content using Adobe Photoshop and Illustrator for use on client websites as well as iterating based on feedback after client review.
- Designed and deployed multiple webpages for client long term use.
